Course Overview

The Advanced Project Management Programme (APM) equips managers with principles and the know-how of completing projects on time, within budget and while meeting expectations. The six modules offer a practical, step-by-step approach to managing a project over its entire lifecycle – from inception to close out.

The APM is designed for current and prospective middle managers as well as investors and developers in all industries

Course Outcomes

- Problem solving and decision making that can improve the effectiveness of individuals and organisations
- Understanding of the value chain management process in an organisation and to demonstrate the interactive relationships among marketing, operations and purchasing
- Wider perspective of marketing decisions, including the close interface with other business functions and overall business strategy
- Understanding of, and insight into, the dynamics related to planning, attracting, utilising, developing and leading employees in local and international organisations
- Understand social, political and environmental aspects of feasibility analyses
- Ensure that certain aspects of the labour law are complied with
- Understanding of the principles of project management and the interrelationships of human resources, budgeting, contracts, negotiation, decision making and systems on managing a project
