Course Overview

Financial management is a discipline that affects every area of business – it is central to the processes of resource transformation and shareholder value. Whilst business is concerned with several relationships, with customers and employees – its relationships with the providers of finance are central to the strategic decision-making process.

In order for organisations to be effective, maintain their niches and be competitive, they have to align their finances with their strategies. This requires their managing their finances strategically. In this course, participants will be taught how to align the finances of their organisations with their strategies.

Course Outcomes

- To introduce fundamental bookkeeping and accounting concepts to course participants to enable them to manage the financial aspects of their role more effectively.
- To review the different approaches taken in the public and private sector
- To make sense of key financial statements and some key ratios
- To enable participants to manage financial aspects of projects more effectively
- To participate more knowledgeably in the budgeting process.
