## Course Overview

IPSASs aim to improve the quality of general purpose financial reporting by public sector entities, leading to better informed assessments of the resource allocation decisions made by governments, thereby increasing transparency and accountability. The International Public Sector Accounting Standards Board (IPSASB) issues accounting standards and recommended practice guides relating to the financial reporting needs of national, regional and local governments, governmental agencies, and the constituencies they serve. The International Public Sector Accounting Standards (IPSAS) issued by the IPSASB represent a comprehensive set of authoritative international financial reporting standards for governments and other public sector entities

The IPSAS accounting and disclosure requirements are explained in clear, simple language and illustrated with model financial statements and real-world examples. Application of the various standards is illustrated through the use of short case studies.
