## Course Overview

Whether you are new to civil engineering or are ready to advance your engineering skills, the courses below are designed to teach students about the role of civil engineering in modern society and the principles and laws that contribute to the field

This course is intended to teach you the conceptual things that check your logical reasoning capacity. It will polish your knowledge regarding some of the basic questions on civil engineering. This course is intended for civil engineering students who are about to complete their engineering course and the fresh civil engineering graduates who are about to seek a job. This course will keep on expanding as I will keep on adding the lectures.

## Course Outcomes

---

- Contractual process, site works, site handling, concrete works, rebar works etc.
- Structure knowledge and working at site.
- They will be able to understand how the steel structures are designed.
- Project Management
- They will be able to calculate Dead Load, Product Loads, Thermal Loads and Wind Loads as per ASCE 07-10
- Valuable Resources that they can use in their Regular Design Calculations
